Reset Your World: CISOs and Chief Risk Officers

Security and risk management leaders have evolved their thinking in the past 10 years from stopping threats to helping the business take calculated risks to stay competitive. Many companies have textbook-perfect policies. However, the organization as a whole probably has not changed enough to turn policies into a consistent practice. Many of the old attitudes and practices remain that paint the organization as a hurdle, rather than a help, to the business.

European Leaders should make 2013 the year to push the “reset” button. They don’t have to start from scratch, but they need to take a step back, focus on strategy rather than pure technology, and expedite the transformation of their organizations to a productive, business-oriented function. Being business leaders, security and risk management leaders must create a deliberate strategy to run, grow and transform the business of their organizations. The different disciplines within this area — **risk management, business continuity management, compliance, security and privacy** — play more or less prominent roles, depending on the strategic focus.

HOT TOPICS

- *Mobile Security*
- *Cloud Computing and Security*
- *Cyber Security*
- *Web Application Security*
- *Business Continuity and Disaster Recovery*
- *Bring Your Own Device (BYOD)*
- *Compliance and Regulation*
- *Risk Management*

“ Gartner are unique in being able to capture the experience of many companies in many markets and distill this into useful/pragmatic techniques and tools. No other company can match their breadth and depth. ”

Head of Information Security, Sky Network Services

are the new business leaders

GARTNER PREDICTS

By 2016, enterprise security leaders will rank operational technology security among the top-three most critical security issues facing IT.

Why Attend?

- **Learn** to drive measurable **improvements** in security performance
- **Build** security and risk management programs that **meet current and future business** needs
- Learn how to make **efficient and effective** risk management programs that scale with business growth and change
- Avoid **costly or wasteful mistakes** in selecting your approaches or vendors
- Integrate **business continuity management** with overall risk management programs
- Discover how **legal, security, privacy and risk management** leaders **can work together** to improve overall governance and business outcomes

Who Should Attend?

Senior business and IT leaders including:

- CISOs, CSOs and their teams
- CIOs and other IT directors
- Anyone responsible for IAM programs
- Vice presidents, directors and managers of information security
- Network security managers and directors
- IT/IS directors and managers
- Enterprise architects and planners
- Finance executives and risk managers

Analyst-User Roundtables

Moderated by a Gartner Analyst, these roundtables are a great forum for exchanging ideas and hearing what your peers are experiencing around a particular issue.

*Pre-registration is required.
Reserved for end-users.*

Case Study Sessions

Hear real hands-on “this is how we made it happen” insight, from international organizations whose senior executives are working on the best and most successful security and risk management initiatives in Europe.

The latest case study information will be added to the agenda as it is confirmed at gartner.com/eu/security

Meet One-on-One with a Gartner Analyst

Gartner Events give you more than what your normal industry event offers. Meeting face-to-face with a Gartner analyst is one of the key benefits of attending a Gartner Summit. Personalize your 30 minute private appointment to discuss your specific issue and walk away with invaluable, tailor-made advice that you can apply to your role and your organization straight away.

AGENDA AT A GLANCE

16:45 – 17:30	Gartner Closing Keynote and Summit Close: The Gartner Five Year Security and Risk Scenario <i>Christian Byrnes</i>			

At the Summit, please refer to the agenda in the event guide provided, for the most up to date session and location information

Agenda correct as of 29 May 2012

BUILD YOUR OWN AGENDA

Powerful tools to navigate manage and decide

To get the most out of your Summit experience, we've created a range of tools to help you manage your goals and objectives of attending.

Online Agenda Builder

A powerful planning tool designed to help you organize, view and select an agenda based on the following criteria:

- Analyst profile
- Date and time
- Schedule analysts one-on-ones
- Schedule a roundtable
- Session descriptions
- Activities by day

Go to ab.gartner.com/sec14i to view the full agenda.

Event Approval Tools

Our Event Approval Tools make it easy to demonstrate the value of your Summit experience. It includes a customizable letter, cost-benefit analysis, cost optimization highlights, top reasons to attend and more.

Find it at gartner.com/eu/security

Gartner Events Navigator Mobile App

Manage your agenda anytime, anywhere with Gartner Events Navigator

- Get up-to-the-minute event updates
- Integrate social media into your event experience
- Access session documents and add your notes
- Available for iPhone, iPad and Android

08:50 – 09:10 60 Seconds or Bust: Summit Solution Snapshots

MEDIA PARTNERS

WHY GARTNER EVENTS

Gartner is the world's leading information technology research and advisory company. Our pivotal advantage: 890 analysts delivering independent thinking and actionable guidance to clients in 12,400 organizations worldwide. The majority from the Fortune 1000 and Global 500.

This extensive body of knowledge, insight and expertise informs all of our 60+ events around the world. You simply won't find this unique quality of content at any other IT conference. Why? Because no one understands the impact of technology on global business like we do.

What's New in 2013?

- Stronger/more explicit focus on the Nexus of Forces – without losing sight of foundational and day-to-day needs
- New mini track on security of operational technology
- More presentations per track
- Gartner For Technical Professionals content as a virtual track
- 10 analysts who did not present at the event in 2012, including 5 who have never presented at this Summit

Team attendance: Maximise learning by participating together

View full team benefits on gartner.com/eu/security

“ This event proved to be filled with lots of useful sessions, providing information and action plans to go with them. And all that in a pleasant atmosphere! ”
