

New! Industry Day Perspective Forums

Aligning IT-specific initiatives to the industry's business success is the focus of every IT professional. The challenge is how to illustrate IT's impact on the business goals — whether to the bottom line, quality, expense control or client satisfaction. That's why we are pleased to kick off our Monday program with special Industry Perspectives Forums. Five sectors are covered in separate tracks that deliver targeted content and industry-specific perspectives for the following: Energy & Utilities, Government, Healthcare, Financial Services, and Manufacturing. Industry Day Perspective Forums sessions include:

Government

1G1. Case Study

TBA

IG2. Critical Infrastructure Protection Requirements Driving New Security Demand

Ruggero Contu

IG3. Best Practices for Mitigating Advanced Persistent Threats

Lawrence Pingree

Financial Services
