

Contents

1.0	Introduction and Executive Overview	1
1.1	Research Elements Used in This Report	3
1.1.1	Probabilities Defined	3
1.1.2	Type A, B and C Enterprises Defined	4
1.1.3	The Gartner Magic Quadrant	4
1.1.4	The Gartner Hype Cycle	5
1.2	The Mobile Business Value Scenario	6
1.3	Components of the Mobile Enterprise	8
1.4	Business Continuity and Performance in a Mobile World	11
1.5	Managing the Mobile and Wireless Workforce	13
1.6	Enhancing Customer Service With Mobile Technologies	15
1.7	The Mobile-Device Market: Today's Technologies, Tomorrow's Trends	17
1.8	Wireless Machine-to-Machine Communications	19
1.9	The Value of the Tablet PC	20
1.10	Wireless Standards: Status, Battles and Trends	21
1.11	Boosting Productivity With Wireless E-Mail and Messaging	23
1.12	RFID: Separating Vision From Delusion	25
1.13	Wireless LAN Integration and Management	27
1.14	Mobile Application Development and Web Services	29
1.15	Off-the-Shelf Mobile Application Platforms	30
1.16	Controlling Costs and Increasing ROI: Carriers and Network Services	33
1.17	Controlling Costs and Increasing ROI: Laptops and Small Devices	36
1.18	Mobile Security and Privacy: Is Your Enterprise Vulnerable?	38
1.19	Wireless LAN Intrusion-Detection Options and Costs	39
1.20	Mobile Authentication – How to Identify and Verify Anyone, Anytime, Anywhere ...	42
1.21	The Remote-Access Service and Vendor Landscape	43
1.22	Network Convergence in Real-Time Enterprises	45
1.23	Network Titans in the Wireless World	47
2.0	The Mobile Business Value Scenario	49
2.1	Key Wireless Technologies	50
2.1.1	Wide-Area Networks	51
2.1.2	Short-Range Wireless Networks	51
2.1.3	Innovative Handheld Devices	52
2.1.4	WLANs	52
2.1.5	Machine-to-Machine Wireless	53
2.1.6	PDA's	53
2.2	The Mobile/Wireless Market Through 2008	54
2.2.1	The Three Phases of Mobility Adoption	55
2.2.2	Mobilizing the Workforce	56
2.2.3	Mobile Security Strategies	57
2.2.4	Architecture for a Multichannel, Multimodal Future	57

- 2.2.5 Enterprise Wireless Management Resolutions 58
- 2.2.6 WLAN Hot Spots 58
- 2.2.7 Mobile Commerce 59
 - 2.2.7.1 Potential Mobile Commerce Growth 59
- 2.3 Recommendations 60
- 3.0 Components of the Mobile Enterprise 61**
 - 3.1 Investment Components 62**
 - 3.1.1 Enterprise Adoption of Mobile Applications 63
 - 3.1.2 Linking Mobile Investment to Business Unit and IT Activities 64
 - 3.2 Technology Components 64**
 - 3.2.1 Mobile Enterprise Building Blocks 65
 - 3.2.2 Mobile Computing’s Trade-Offs 66
 - 3.2.3 Delivery Technology 66
 - 3.2.4 Wireless and Mobile Application Hype Cycle 66
 - 3.2.5 Wireless and Mobile Networking Hype Cycle 67
 - 3.2.5.1 Key Wireless Networking Protocols 68
 - 3.3 Workforce Components 69**
 - 3.3.1 Creating a Mobile Workforce 70
 - 3.4 Recommendations 71
- 4.0 Business Continuity and Performance in a Mobile World 73**
 - 4.1 The Evolution of Networking Technologies 73**
 - 4.1.1 Web-Enabled Applications: High Cost, Low Performance 74
 - 4.1.2 Case Study: Insurance Pre-Qualification Application 74
 - 4.1.3 Case Study: iMode Online Trading 75
 - 4.1.4 Mobile Application Delivery 75
 - 4.2 Application Optimization 75**
 - 4.2.1 Drivers for Web-Enabled Applications 75
 - 4.2.2 Network-Effects of Web-Enabled Applications 76
 - 4.3 Improving Mobile Application Performance 76**
 - 4.3.1 Increasing Web Server Capacity 76
 - 4.3.2 Internet Data Center Sites 77
 - 4.3.3 Virtualization of the IP Data Center 77
 - 4.3.4 Route Control 77
 - 4.3.5 Global Redirection 78
 - 4.4 The Web-Enabled Architecture Arena 78**
 - 4.4.1 Consolidation vs. Innovation 79
 - 4.4.2 Web-Enabled Application Delivery Magic Quadrant 79
 - 4.5 Recommendations 80
- 5.0 Managing the Mobile and Wireless Workforce 81**
 - 5.1 The Changing Dynamics of Workplace Relations 82**
 - 5.1.1 Remote Supervision Challenges 82
 - 5.1.2 Next-Generation Productivity 83
 - 5.1.3 Managing an “Anytime” Work Environment 83
 - 5.2 Mobile and Wireless Technologies for the Place-Independent Work Style 84**
 - 5.2.1 The Virtual Workplace 84
 - 5.2.2 Hot Mobile Technologies: Do They Support Real Work? 84
 - 5.2.3 Evaluating Mobile and Wireless Technologies for the Workplace 85

5.3	Management Best Practices	85
5.3.1	Communicating with a Virtual Workforce	85
5.3.1.1	Management Communications	86
5.3.2	Performance Measurement	87
5.3.3	Nurturing Workgroup Coherence	88
5.3.4	Case Study: Surveying the Work Life Quality	88
5.3.5	Evaluate the Mobile Chain	89
5.3.6	Battling Myriad Message Queues	89
5.3.7	Achieving High Value of Investment	89
5.4	Recommendations	90
6.0	Enhance Customer Service With Mobile Technologies	91
6.1	Mobile Device Innovation	91
6.1.1	PDA Platform Wars	92
6.1.2	Mobile CRM Data Costs	92
6.1.3	Data Bandwidth Performance	93
6.2	Making Mobile Investment Decisions	93
6.2.1	Assessing Mobile Productivity Gains	94
6.3	Mobile Enterprise Applications: Designing for Device Proliferation	95
6.3.1	Case Study: University of South Florida	96
6.3.2	Case Study: CB Richard Ellis	97
6.3.3	Case Study: Consumer Goods Enterprise	97
6.3.4	Mobile Enterprise Application Platforms	98
6.4	Recommendations	99
7.0	The Mobile-Device Market: Today's Technologies, Tomorrow's Trends	101
7.1	The Future for Mobile Devices	101
7.1.1	Smartphones	102
7.1.2	Wireless E-Mail	103
7.1.3	Keyboard-Based Devices	103
7.2	Mobile Device Software Platforms	103
7.2.1	Microsoft Windows Mobile	104
7.2.2	Microsoft's Longhorn Operating System	105
7.2.3	Palm and the Palm OS	105
7.2.4	Research In Motion	105
7.2.5	Java Mobile Environment	106
7.2.6	Windows CE	106
7.3	Mobile Applications	107
7.3.1	Camera Phones	107
7.4	Develop an Enterprise PDA Policy	108
7.5	Controlling Mobile Costs	108
7.6	Recommendations	109
8.0	Wireless Machine-to-Machine Communications	111
8.1	Hot M2M-Enabling Technologies	111
8.1.1	M2M Networking Cost Trends	112
8.1.2	M2M Mesh and Sensor Networks	113
8.1.3	Wireless M2M System Architectures	114

8.2	Wireless M2M-Enabled Business Models and Processes	115
8.2.1	M2M Case Study: Automotive Telematics	115
8.2.2	M2M Case Study: Port Operations	115
8.2.3	M2M Case Study: Waste Water Management and Treatment	116
8.2.4	M2M Case Study: Energy Metering and Management	116
8.3	M2M Market Characteristics	117
8.3.1	Mobile Network Operators	117
8.3.2	M2M Value Chain Opportunities	117
8.3.3	Large-Scale M2M Issues and Challenges	118
8.4	Recommendations	119
9.0	The Value of the Tablet PC	121
9.1	Tablet PC Adoption	121
9.1.1	Four Barriers to Mainstream Adoption	122
9.1.2	Windows XP Tablet PC Edition 2004	123
9.1.3	Pen-Enabled Applications	123
9.1.4	Improving Pen Usage	123
9.2	Applications for Tablet PC	124
9.2.1	Form Factor Options	124
9.2.1.1	Which Form Factor Is Best?	125
9.2.2	Evaluating Tablet PCs	125
9.2.3	Ruggedized Tablet PCs	125
9.2.4	Cost of Ownership Impact of Tablet PCs	126
9.3	Tablet PC Vendors	126
9.4	Tablet PC Case Studies	127
9.4.1	Aureole Restaurant	127
9.4.2	Georgia State Board of Pardons and Paroles	128
9.4.3	Associated Physicians for Women	128
9.5	Recommendations	128
10.0	Wireless Standards: Status, Battles and Trends	129
10.1	The Development of Short-Range Wireless Standards	130
10.1.1	Short-Range Wireless Networks	131
10.1.2	Smart Objects	132
10.1.3	IEEE WPAN Task Groups	132
10.1.4	Bluetooth	133
10.1.5	UWB Update	133
10.1.6	ZigBee	133
10.2	WLAN Standards	135
10.2.1	The Evolution of WLAN Standards	136
10.2.2	WLAN Vendors	137
10.2.3	WLAN Myths	137
10.3	WWAN Capabilities Through 2008	138
10.3.1	WWAN Service Technology	138
10.3.2	Next-Generation Technologies	138
10.3.3	When to Use Current and Future Wireless Standards	140
10.4	Recommendations	141
11.0	Boosting Productivity With Wireless E-Mail and Messaging	143
11.1	Wireless E-mail Trends	143
11.1.1	Improved Mobile Worker Productivity	144
11.1.2	Enterprise Performance Initiatives	144

11.2 Wireless E-mail Architectures and Vendors	145
11.2.1 Wireless E-mail and PIM Architecture	145
11.2.2 Wireless E-mail and PIM Tools	146
11.2.3 Wireless E-mail and PIM Vendors	147
11.2.4 Wireless E-mail and PIM Devices	148
11.3 The Future for Wireless E-mail	148
11.3.1 An Integrated Messaging Model	148
11.3.2 The Promise of Unified Messaging	149
11.3.3 Integrated Messaging	150
11.3.3.1 Integrated Messaging Model	150
11.4 Recommendations	150
12.0 RFID: Separating Vision From Delusion	151
12.1 RFID: Current and Future Capabilities	152
12.1.1 RFID Frequencies	152
12.1.2 The Low-Cost RFID Tag Myth	152
12.2 RFID Usage	153
12.2.1 Strategic Bar Code Assumptions	154
12.2.1.1 Strategic Bar Code Assumption No. 1	154
12.2.1.2 Strategic Bar Code Assumption No. 2	155
12.2.1.3 Strategic Bar Code Assumption No. 3	156
12.2.1.4 Strategic Bar Code Assumption No. 4	156
12.2.1.5 Strategic Bar Code Assumption No. 5	156
12.2.2 RFID-Centric Retailing	157
12.3 Optimizing RFID for Competitive Advantage	158
12.3.1 RFID Hype Cycle	158
12.3.2 The Wal-Mart Factor	158
12.3.3 RFID Prototyping Environments	158
12.3.4 EPC Standards	159
12.3.5 Consumer Privacy Advocates	160
12.4 Recommendations	161
13.0 Wireless LAN Integration and Management	163
13.1 The Evolution of WLAN	164
13.1.1 WLAN Purchasing Bubbles	165
13.1.2 Managing a Secure Enterprise Airspace	165
13.1.3 Owning Enterprise Airspace	165
13.1.4 Managing a Secure Enterprise Airspace	166
13.2 Merging WLANs into Enterprise Network Architectures	167
13.2.1 WLAN Access Point Architectures	168
13.2.2 Antenna Choices	169
13.2.3 Edge Switches	169
13.2.4 Network Intelligence Distribution	170
13.2.5 Securing WLAN Access	170
13.3 WLAN Deployment Strategies	171
13.3.1 WLAN Design Trade-Offs	171
13.3.2 Cisco: Proprietary Initiatives vs. Industry Standards	172
13.3.3 Can WLANs Replace Wire?	173
13.4 Recommendations	174

14.0	Mobile Application Development and Web Services	175
14.1	Mobile Client Application Delivery	175
14.1.1	Mobile Architectures	176
14.1.1.1	Server-Side Mobile Architectures	176
14.1.2	Network Issues for Application Developers	176
14.1.3	Wireless Application Gateways	177
14.1.4	The Mobile Tools Market	178
14.1.4.1	Symbian	179
14.1.4.2	Microsoft Development	180
14.1.4.3	Palm Development	181
14.1.4.4	Mobile Programming Tools	181
14.1.4.5	Mobile Java	182
14.1.4.6	Web Services and Mobile Applications	183
14.1.4.7	Addressing Mobile Market Volatility	184
14.1.4.8	Mobile Testing and Certification	184
14.2	Mobile Trends	184
14.2.1	The Evolution of Mobile Applications and Architectures	185
14.3	Recommendations	185
15.0	Off-the-Shelf Mobile Application Platforms	187
15.1	Mobility and IT Architectures	188
15.1.1	The Multichannel Architecture	188
15.2	Mobile Platforms	189
15.2.1	Off-the-Shelf Platforms	189
15.2.2	Case Study: Pepsi Bottling Group	190
15.2.3	Mobile Enterprise Applications	190
15.2.4	The Adaptive Application Architecture: WAGs and MAGs	192
15.2.5	Mobile Platform Integration Points	193
15.2.6	Case Study: Hill Air Force Base	194
15.2.7	Case Study: Rush Medical Center	194
15.3	Multichannel Application Gateway Vendors	194
15.3.1	Multichannel Vendor Functionality	196
15.4	Off-the-Shelf Mobile Platform Selection Criteria	197
15.4.1	Creating a Mobile Platform “Imperative”	197
15.4.2	Picking Mobile Platforms: Four Simple Rules	197
15.5	Recommendations	198
16.0	Control Costs and Increase ROI: Wireless Carriers and Network Services	199
16.1	Enterprise Mobile and Wireless Cost Centers	200
16.1.1	Wireless Service Providers	200
16.1.2	Wireless WAN Service Predictions	200
16.2	Evaluating the Costs and Benefits of Wireless Technology	202
16.2.1	Enterprise Wireless Service Costs	202
16.2.2	Enterprise Wireless Contract Pricing	202
16.2.3	Wireless Pricing Analysis and Trends	203
16.2.4	Wireless WAN TCO	204
16.2.5	Switching Wireless Service Providers	205
16.3	Managing Wireless Services	206
16.3.1	Best Practices for Managing Services	207
16.3.2	The RFP Process	208

16.3.3	Adoption and Usage Policy	208
16.3.4	Top Myths When Buying Wireless Services	209
16.3.5	Supporting International Users	209
16.3.6	Wireless Data Services	210
	16.4 Recommendations	211
17.0	Control Costs and Increase ROI: Wireless Laptops and Small Devices	213
17.1	Managing Laptops and Small Devices	214
17.1.1	Framework Solutions	214
17.1.2	Microsoft's System Management Server	214
17.1.3	Mobile User Security Products	215
17.1.4	Three Mobile Management Scenarios	215
17.2	The Role of TCO in Guiding Management Decisions	216
17.2.1	Complexity and TCO	217
17.3	Management Best Practices	217
17.3.1	Develop a Personal Device Policy	217
17.3.2	Manage Configuration Controls	218
17.3.3	Operate a Backup-and-Restore Method	218
17.3.4	Manage Mobile/Wireless Work Styles	219
17.3.5	Manage Mobile Configurations and Cost	219
17.3.6	Embrace Architectural Diversity	219
	17.4 Recommendations	220
18.0	Mobile Security and Privacy: Is Your Enterprise Vulnerable?	221
18.1	Mobile and Wireless Security Issues	221
18.1.1	The 802.11i Process	222
18.1.1.1	WLAN Security History	222
18.1.1.2	WPA Shortcomings	222
18.1.1.3	When and How to Implement WPA and WPA2	223
18.2	Mobile and Wireless Security Best Practices	223
18.2.1	WLAN Intrusion-Detection System Types	224
18.2.2	Protect the Enterprise	224
18.2.3	Protect the Data	225
18.2.3.1	Mobile Data Encryption Magic Quadrant	226
18.2.3.2	Decision Framework	226
18.2.4	Protect the Airwaves	226
18.2.5	Antivirus and Personal Firewalls	228
18.2.6	Secure Sockets Layer	229
18.2.6.1	SSL's Impact on the IPsec Market	229
18.2.6.2	Case Study: Petroleum Processor and Retailer	229
18.2.7	Wireless Viruses	231
	18.3 Recommendations	232
19.0	Wireless LAN Intrusion-Detection Options and Costs	233
19.1	WLAN-related Security Exposure Issues	233
19.1.1	Solving the WLAN Coverage Problem	235
19.1.2	Extending WLAN Usability	235
19.1.3	WLAN End-User Growth	236
19.1.4	Securing Enterprise Access Points	236
19.1.5	The Weakness of WEP	236

19.2 WLAN Detection and Management Practices	237
19.2.1 WLAN Site Surveys	237
19.2.2 VPNs Are Not Enough	237
19.2.2.1 Turning Down the WLAN Power	237
19.2.2.2 Putting WLANs on Segregated VLANs	238
19.2.2.3 Taking the Sniffer Walk	238
19.2.2.4 Applying Wired “LAN” Defenses	238
19.2.2.5 Using Access Points as Sensors	239
19.2.2.6 Using Hybrid, Active Monitoring Tools	239
19.3 Recommendations	239
20.0 Mobile Authentication — How to Identify and Verify	
Anyone, Anytime, Anywhere	241
20.1 The Role of Authentication	242
20.1.1 Mobile Authentication Factors	242
20.1.2 The Need for Stronger Authentication	242
20.1.3 Legal Implications	243
20.2 Mobile Authentication Technologies	243
20.2.1 User Authentication via Tokens	243
20.2.1.1 Tokens Migrate to Small and Portable Devices	244
20.2.2 Biometric Authentication	244
20.2.2.1 Vendor Biometric Efforts	245
20.2.3 Device Authentication Challenges	245
20.2.4 Additional Device Authentication Requirements	245
20.3 Strengthening Mobile Authentication Efforts	246
20.3.1 Mobile Authentication Decision Framework	246
20.3.2 Bundling User Value With Mobile Authentication	246
20.3.3 The Shallow Side of Portable Personality	247
20.3.4 The Storage Dongle Market	248
20.4 Recommendations	248
21.0 The Remote-Access Service and Vendor Landscape	249
21.1 The Evolution of Remote Access	249
21.1.1 The Remote Access Market, 2003-2007	250
21.1.2 Access Technologies	251
21.1.2.1 Broadband Access	252
21.1.3 Categorizing Remote Users	253
21.2 Remote Access Technologies	253
21.2.1 Machine-to-Machine	253
21.2.2 IP VPNs	254
21.2.3 Secure Sockets Layer	254
21.2.4 Complementing Wireless Network Solutions	254
21.2.5 Next-Generation Mobile Data	255
21.2.6 Residential Internet Access	256
21.3 Remote Access Best Practices	257
21.3.1 Reducing Remote Access Costs	257
21.3.2 Thin-Client Solutions	257
21.3.3 In-Office vs. Remote Support	259
21.3.4 Creating Effective SLAs	259

21.4 The Vendor Arena	259
21.4.1 VPN Service Providers	259
21.4.2 Wireless Service Providers	260
21.5 Recommendations	261
22.0 Network Convergence in Real-Time Enterprises	263
22.1 Physical Convergence	264
22.1.1 The Evolution of Convergence	264
22.1.2 Multinetwork and Multimodel Business Devices	264
22.1.3 The Role of Service Providers	264
22.1.4 LAN Convergence	265
22.1.5 Wireless IP Telephony	266
22.1.6 Mobile Device Convergence	266
22.1.7 Converged Wired and Wireless	266
22.2 Logical Convergence	267
22.2.1 A Convergent Enterprise Architecture	267
22.2.2 Developing a Converged View of Security	268
22.2.3 Managing Messaging Architectures	269
22.2.4 A Converged View of Enterprise Architecture	270
22.3 Convergence-Friendly Technologies	270
22.4 Convergence Timeline	271
22.4.1 Network Convergence, 2003-2009	272
22.5 Recommendations	273
23.0 Network Titans in the Wireless World	275
23.1 Network Equipment Vendors	275
23.1.1 The Impact of Convergence and IP Telephony	277
23.1.2 Cisco vs. the Voice and Data Vendors	278
23.1.2.1 Full Portfolio Comparison	278
23.1.3 Magic Quadrants for Enterprise Infrastructures	279
23.1.4 Magic Quadrant for North American Enterprise Telephony, 2003	279
23.2 Looking Beyond Cisco	281
23.2.1 The Cisco Influence Curve	282
23.2.2 Fortress Cisco: Building Barriers to Interoperability	282
23.2.3 The IOS Dilemma: Finding the Middle Ground	282
23.2.4 Can Cisco Grow to the Next Level?	283
23.2.5 Cisco's Strengths and Challenges	283
23.3 Selecting the Right Networking Equipment Vendor	284
23.3.1 What About TCO?	284
23.3.2 Negotiating With Network Hardware Vendors	284
23.4 Recommendations	286
Appendix A: Glossary	287
