

## **Gartner Predicts 2002: Security and Privacy**

**Vic Wheatman**

This is a Letter From the Editor for the "Gartner Predicts 2002: Security and Privacy" issue of the Security and Privacy Spotlight.

## ANALYSIS

---

We began our review of enterprise security and privacy and provided forecasts for 2002 (and beyond) in our last Spotlight, "Future Topics and Trends in Security and Privacy" (LE-15-0044). Now, we take a more far-reaching view in this issue, "Security, Privacy and Risk Management: 2002 and Beyond" (AV-14-9028), which complements forthcoming research on security trends and technologies from across Gartner's lines of business. We invite you to frequently visit [www.gartner.com](http://www.gartner.com) for information on how to improve enterprise security, biometrics, homeland security, transaction incident management and electronic surveillance.

Your inquiries and comments are welcome.

Victor S. Wheatman

Editor in Chief
