Introducing your PUBLIC SECTOR FORUM

The volume, velocity and variety of data that the public sector industry provides offers new possibilities to extract insights. However, it’s challenging to build the capabilities to efficiently capture, integrate, standardize and secure this data.

With this in mind, you’ll have the opportunity to attend a series of special presentations, breakfast and networking sessions designed for public sector professionals during Gartner Business Intelligence, Analytics & Information Management Summit 2016, so you can access the new strategies you need to accelerate progress to success on all your BI and analytics priorities.
