Ask the Analyst: Mobility Platforms Explained  Martin Birkner

Panel Discussion

The automotive industry is facing disruption with the rise of digital technology that offers multimodal mobility options, together with a new user experience of autonomous driving. Data analytics and artificial intelligence support new service models in industries and smart cities. This panel will discuss the changes in vehicle ownership and mobility-as-a-service in the light of consumer and business transportation requirements and experiences. We will examine future horizontal technological capabilities in the automotive industry to meet those challenges and the role of OEM ecosystems.
