Gartner Identity & Access Management Summit 2017

6 – 7 March / London, UK / gartner.com/eu/iam

Gartner Summits

Suggested Agenda for Financial Services

Financial services worldwide face significant challenges maintaining and upholding security and compliance whilst simultaneously meeting demands for instant access across a complex and rapidly changing IT infrastructure and landscape.

While most major financial institutions are considered global leaders in IAM maturity, most large organisations are considering a strategic and long-term approach when looking at their IAM needs. Although most within the industry have made significant investments in implementing the latest IAM technology solutions. There are now multiple products available to address the breadth of requirements, but choosing the right one and effectively rolling it out still presents some challenges. The implementation of an IAM strategy is never just a technology change: it needs to be seen holistically in order to reap the full benefits.

Take advantage of industry expert advice at the **Gartner Identity & Access Management Summit 2017** where you can validate your strategy — armed with the full picture, you will achieve greater success as a leader, how to drive innovation and deploy technology to add value.
