Gartner Security & Risk Management Summit 2016
22 – 23 August  | Hilton Sydney
gartner.com/ap/security

Hot topics
• Cloud Security
• Mobile Security
• Application Security
• Data Security
• Security Awareness
• Risk Management
• Cybersecurity
• Internet of Things
• Endpoint Security
• Identity and Access Management

CELEBRATING 10 YEARS
The new digital business environment offers huge potential for organizations to transform the way they deliver services and products. However, in the rush to innovate, you must remain cognizant of the risks resulting from this innovation while continuing to enable business aspirations. Increasing integration of IT, OT and IoT pose unprecedented challenges to risk and security leaders. Building trust and resilience are key to seizing opportunities and reducing risks. You need to challenge convention and consider new operating models to remain relevant.

The 10th annual Gartner Security & Risk Management Summit, 22 – 23 August in Sydney, Australia will provide you with the proven practices and strategies that you need to maintain cost-effective security and risk programs to support digital business and drive enterprise success.

Build the trust and resilience needed to seize opportunities, reduce risks, and deploy new security models.
Gartner Predicts: By 2019, enterprises will spend over $1.2 billion on application security, doubling the $600 million spent in 2014.

Key benefits

• Gain role-specific strategies, tools and insights to stay ahead of expanding scopes of responsibility and increasing threats
• Align security and risk management strategies with enterprise objectives
• Assure compliance with new regulatory, compliance and privacy requirements
• Learn how to apply the latest techniques to tackle risks in cloud, OT, IoT and IT
• Maximize enterprise ROI by using the latest enterprise resilience practices

Who should attend

• Chief Information Security Officer (CISO)
• Chief Risk Officer (CRO)
• Chief Privacy Officer
• Security Professionals
• Security Technology Professionals
• IT Risk Professionals
• Business Continuity and IT Disaster Recovery Professionals
• Network Security Managers
• Finance, Audit, Legal Risk and Compliance Managers

Gartner Predicts: By 2019, 30% of chief information security officers (CISOs) will adapt risk management practices to support bimodal IT and improve Mode 2 success rates while reducing costs.
Keynotes

Guest keynotes

Leadership, Influence and Cultural Change
We all have a leadership role which differs from the myriad of management tasks that fill our professional lives. Leaders see issues that shape the long term health of the organizations of which they are a part. They identify with those issues. They strive to find a logical and credible path to engender beneficial change. They are able to influence that change through being able to clearly articulate risk and reward. Through their actions they demonstrate their commitment. This address will provide insight as to how key issues are identified, how the language of change is best applied and how the development of an inclusive organizational culture is the foundation for corporate success.

Lieu tent General David Morrison AO
Australia’s Former Chief of Army and Australian of the Year 2016

A Holistic Look at Risk — From Practical Experiences to Opportunities
How do you attach value to risk? How do you manage public acceptance of risk to the general perception of it? How do you build resilience in difficult environments? How do you drive collaboration to lower risk and improve performance? These are just some of the questions that Andrew MacLeod will address in his keynote presentation, bringing in practical experiences from Rio Tinto, Barrick Gold, NGOs, government agencies and the finance sector.

Professor Andrew MacLeod
Organizational Leader and Former Managing Director of Good Super

Gartner Closing Keynote: Security 2020 — The Future of Cybersecurity
Digital business is changing the way that IT is planned, delivered and managed. Cybersecurity will change as pressures from the cloud, IT/OT convergence and the Internet of Things become more intense. We continue our work on the intersecting forces that will drive your strategy through 2020.

Rob McMillan
Research Director

Security and Risk Management Trends
Digital business is here to stay, and security is a growing concern in a world that increasingly intertwines business with IT, and the physical with the digital. The evolution of cloud and mobile technologies, as well as the emergence of the Internet of Things (IoT), is elevating the importance of security and risk management as foundations. In fact, these trends are also changing what organizations should incorporate into their information security or cybersecurity programs: Resilience is the foundation for digital business, and it encompasses privacy, safety and reliability. Security and identity technologies and practices are key factors in ensuring that these three objectives can be met. Figure 1 shows five aspects of cybersecurity that should be considered in 2016.
Many attendees tell us that an analyst one-on-one meeting is worth the price of admission, all by itself.

Book a private consultation on-site with a Gartner analyst to receive tailor-made advice that you can apply to your role and organization.

Plan your experience

Agenda tracks

A  Chief Information Security Officer (CISO) Program
The acceleration toward digital business has presented CISOs with new challenges. They must understand the goals of the business, quickly identify and assess the associated risks, and communicate the relevant risks to the business in business terms. The CISO Program helps you become a recognized business leader, superstar communicator and facilitator, and problem-solver.

HOT TOPICS:
• Establish and maintain governance
• Manage bimodal risks
• Effective communication
• Demonstrate value
• Improve soft skills
• Prepare for the future
• Identity and access management

B  Risk Management and Compliance Program
Digital risks are increasing as newer data sources and technologies are woven into the fabric of the business. As organizations adopt more cloud technology and explore more digital business opportunities, existing risk management strategies and practices become quickly outdated. This program highlights risks and complexities that you should expect in transitioning to digital business, as well as methods for mitigating these new risk management challenges.

HOT TOPICS:
• Risk management and the cloud
• The risk manager of tomorrow
• Technologies and digital risk
• Aligning with business goals
• Developing an integrated risk management program
• Threat landscape

C  IT Security Program
Get practical methods and long-term strategies to build a more trusted and resilient environment for digital business and to support an IT organization that’s more agile than ever. Sessions cover emerging trends and state-of-the-art practices and technologies for cloud, mobile, data, application endpoint and network security.

HOT TOPICS:
• Cybersecurity
• Enabling a safer cloud
• Mobile security for digital business
• Protecting critical data
• Emerging security technologies
• IoT, network and endpoint security challenges
• Building a resilient infrastructure

D  NEW! TechInsights: Security Architecture
The demands on information security and IT risk practitioners are ever increasing. Not only does the attack and threat landscape change constantly, but organizations’ digital business objectives accelerate the adoption of current and emerging technology. Learn technical and tactical insights that enable risk-aware, business-outcome-focused architectures and solutions.

HOT TOPICS:
• Addressing cloud serviced adoption risk
• Safety and security in Internet of Things
• Application security
• Improving the measurement and management of risk
• Optimizing SIEM and threat intelligence tools
• Privileged account management

Customize your agenda

Gartner Events Navigator App
Gartner Events Navigator helps you organize, view and custom-create an agenda based on:
• Date and time
• Track
• Analyst/speaker profiles
• Session descriptions
• Key initiatives
• Vertical industries

Visit events.gartner.com/go/SEC10A and click the “Event Agenda” tab or download the Gartner Events mobile app (iPhone®, iPad® and Android™ compatible)
Gartner Predicts: By 2020, over 50% of all large IoT implementations will require cloud-based security services to operate within acceptable risks.

Analyst interaction

Analyst one-on-one meeting
A complimentary consultation with a Gartner analyst of your choice

Analyst-user roundtables*
Moderated by Gartner analysts for exchanging ideas and best practices with your peers

Workshops*
Small-scale and interactive; drill down on specific topics with a how-to focus

*Space is limited and pre-registration is required. Limited to end-user organizations only.

Network with peers

End-user case studies
Learn about recent implementations firsthand, with an opportunity for Q&A with the IT and business executives leading the initiative

Ask the practitioner roundtables*
These roundtable discussions, led by your peer, will enable you to interact with others facing the same challenges to discuss best practices and share experiences

Solution Showcase reception
Connect with peers in similar roles who face similar challenges, at the networking reception on the Solution Showcase designed to build relationships and facilitate the meaningful exchange of ideas and information

Meet solution providers

Solution Showcase
Explore cutting-edge IT solutions from top providers

Solution provider sessions
Exhibitors share their insights on the latest products and services

Earn CPE credits
As an attendee of this event, any session you participate in that advances your knowledge within that discipline may earn you continuing professional education (CPE) credits from the following organizations:

- (ISC)² (CISSP, CAP, SSCP and CSSLP)
- ISACA (CISA, CISM and CGEIT)
- DRII (CEAP)
- Business Continuity Institute (BCI) CPD

Gartner events deliver what you need

In addition to four tracks of the latest Gartner analyst research, keynote speakers and case studies, your Summit registration fee includes complimentary access to these special features:

- Analyst one-on-one meeting
- Analyst-user roundtables*
- Workshops*
- Ask the practitioner roundtables*
- Solution Showcase
- Networking breakfasts, lunches and receptions
- Year-round access to videotaped analyst sessions from the North America event

*Space is limited and pre-registration is required. Limited to end-user organizations only.

Group rate discount

Maximize learning by participating together in relevant sessions or splitting up to cover more ground, sharing your session take-aways later.

Complimentary registrations

- 1 for every 3 paid registrations
- 2 for every 5 paid registrations
- 3 for every 7 paid registrations

For more information, email apac.registration@gartner.com or contact your Gartner account manager.

Convince your boss

Attending a Gartner event can help spur new ideas, fast track project strategy and advance your professional skills. We’ve developed a set of materials that will aid in gaining approval from your manager. For more details, visit gartner.com/ap/security.

Early-bird offer!

Register before 24 June to save $375 and receive a complimentary Gartner research report.

Ticket pricing

Early-bird price: $2,575 exc. GST
Standard price: $2,950 exc. GST
Public sector price: $2,450 exc. GST
*Eligibility for the public sector price will be verified
