

# Gartner Security & Risk Management Summit 2015

14 – 15 September | London, UK | [gartner.com/eu/security](http://gartner.com/eu/security)

Manage Risk and Deliver Security in a Digital World

## Take a look at what Gartner predicts for security and risk management:

“Through 2020, supply chain security failures will force 50% of digital businesses to negotiate partner contracts to share risk and liability.”

“By 2017, 30% of threat intelligence services will include vertical-market security intelligence information from the IoT.”

“By 2017, the demand for security analytics as a service will grow by 50%.”

“By 2020, 30% of Global 2000 companies will have been directly compromised by an independent group of cyber activists or cybercriminals.”

“Through 2015, more than 75% of mobile applications will fail basic security tests.”

“By 2017, 50% of large enterprises will use IT services failover between multiple data center sites as their primary disaster recovery strategy.”

“By 2016, a majority of CIOs and CISOs will adopt a GRC Pace-Layered Application Strategy to bolster the risk management program.”

“By 2017, at least one major city using smart city infrastructure will experience a cybersecurity attack on its critical infrastructure that will result in significant disruption including death and injury.”
